CS7P01NM - MSc Project

Assessment Title	Assessment 1 – MSc Project
Assessment Weighting	100%
Contact Person	nimesha@next.lk
Date of Submission	Submission: 07th November 2026 at 2359H (IST) Viva Presentation: 08 th November 2026 at 1000H (IST)

Learning Outcomes

On successful completion of this module, you will be able to demonstrate the following learning outcomes:

LO1 Design, plan, monitor, and manage a piece of original project work.

LO2 Produce a clear set of specifications for the project from its initial stage.

LO3 Critically analyse previous relevant work by the effective use of libraries and other information sources.

LO4 Synthesize knowledge and skills previously gained and apply these to an in-depth project.

LO5 Understand ethical, legal, and professional issues and apply them to a project.

LO6 Integrate theory and practice by applying a range of tools, skills, and techniques.

LO7 Effectively communicate findings in a variety of ways.

LO8 Write a comprehensive and concise report, justify the project implementation, discuss, and explain findings at the Viva.

LO9 Critically evaluate the project outcomes, including evidence of commercial risks.

Task

For the MSc Project, you are required to carry out an independent research project based on the **proposal** with an appointed supervisor. The MSc Project guidelines are given in the “**Friendly Guide to Complete the MSc Project**”. You are required to take the lead role and work with the appointed supervisor throughout the semester.

Format

This is a MSc Project Report. Prepare the report in the form of a professional report with appropriate headings, subheading and a list of references as per given in “**Friendly Guide to Complete the MSc Project**”.

The word limit of the report is 12,000-15,000 Words

Please follow the below formatting guidelines for the MSc Project Report.

- Assessment Cover Page (Please use the provided Assessment Cover Page as the **1st Page** of your report)
- Front page – title of the report. (This should be the **2nd Page** of your report only containing the Title of your report).
- Use **A4 paper size, one-inch margin on all sides.**
- Paragraphs - font; **Arial, size 12**, with **1.5 spacing**
- Headings – font; **Arial, bold, size 14**, with **1.5 spacing**
- Figure, table, illustration, diagram headings; **Arial, italics, size 12**
- Pages to be numbered consecutively, **bottom right-hand side, font Arial, size 12**
- Footnotes, endnotes font; **Arial, size 10, single spacing**
- List of references – Harvard style

You are required to refer the document; “**A Friendly Guide to Complete the MSc Project**” for the report structure.

Assessment Criteria

The available marks for the assessment will be awarded as follows;

Assessment Criteria	Weighing
Rationale and Objectives - Is the topic meaningful, complex and challenging - Are the main areas of investigations identified and measurable objectives	10%
Literature review - Is there evidence of sufficient background reading - Is the literature relevant to the research element and does It provide appropriate context for the work undertaken Including the final deliverables	15%
Project management / planning / PDP - Identification of appropriate milestones - Evidence of sound planning and organisation work - Is the project carried out according to the plan - Reflection on PDP as introduced in the taught modules	5%
Presentation and structure of the dissertation - Is the dissertation sensibly structured and organised Into chapters and sections (e.g. abstract, contents, introduction.... Conclusions, references) - Is the dissertation of professional standard, with well structured Arguments and good written English. - Does the report adequately represent the findings and the work Undertaken by the student with supporting relevant details (e.g. Problems and difficulties explained, identify options available, Decision taken with rationale..etc).	10%

- Have Legal, Social, Ethical and Professional issues been considered in the dissertation - Presentation of references and other supporting documents including appendices	
Methodology - Is the choice of the design methodology appropriate, justified and well Documented - Has the work been carried out using appropriate tools and techniques	5%
Skills development and dissertation level - Depth of analysis and solution design - Is the end-product or resulting artefact complete and efficient with some degree of novelty - To what extent did the student develop his/her knowledge in the Subject area (domain understanding). - To what extent did the student enhance existing skills in his/her area of research and own specific subject area - Presentation and quality of results - Quality of interpretation of results (has the student critically discussed The results and demonstrated its importance to the project)	32%
Appraisal, Evaluation and Recommendation for future work - Has the project been successful in meeting the objectives? where Not achieved, is there evidence to show how the objectives are Pursued - Evaluation of own work (does the dissertation provide an appropriate Critical appraisal of the work undertaken, the deliverables produced And the results obtained from testing the end-product) - Concluding remarks, observations and suggestions for future work - Have potential business and commercial risks that your project outcome may be susceptible to been addressed and evaluated.	18%
Presentation in the VIVA - Quality of presentation and coherence of argument (how good was the Student able to discuss his/her research activities, justify decisions and demonstrated findings). - How well did the student answer the questions on the work he/she Carried out and its context	5%
TOTAL	100%

Please note that marks **50-100** are in the **Pass** category (P for pass on E-Vision).

Marks **70-100** support an award with **Distinction**, **60-69** an award with **Merit**, **50-59** a **Pass** award.

Marks **below 50** are in the **Fail** category, meaning that your award is at risk and that you will have to participate in re-assessment.

Submission

The following submission instructions must be applied and strictly adhered to:

- You are required to submit the following components.
 - MSc Project (Word and PDF)
 - Other Supporting Files
 - Turnitin Similarity Report
- You are required to name your submission file as follows;
 - LMU ID Number_CS7P01NM_A1
- Submissions must be made to the NEXT Moodle submission point on or before **07th November 2026 at 2359H (IST)**. (Please note that submissions through e-mails will not be accepted under any circumstances).

Academic Integrity & Plagiarism

Academic integrity requires honesty in your studies. You should not present another person's sentences or ideas as your own work. You should clearly identify quotations through the use of quotation marks and references to the sources. Failure to adhere to these academic standards may lead to allegations of academic misconduct, which will be investigated by the Casework Office.

- Academic misconduct covers a variety of practices, such as;
- Plagiarism: copying another person's ideas or words and presenting them as your own work, without the use of quotation marks and/or references;
- Self-plagiarism: reproducing parts of one of your assignments in another piece of work;
- Inventing, altering or falsifying the results of experiments or research;
- Commissioning another person to complete an assessment;
- Collaborating with others in the production of a piece of assessed work which is presented as entirely your own work;
- Cheating in an exam (e.g., by taking revision notes into the exam room).

For full details of academic misconduct and how allegations are investigated, see the relevant section of the University's academic regulations:

<https://student.londonmet.ac.uk/your-studies/student-administration/rules-and-regulations/academic-misconduct/>

Post Graduate Marking Criteria	Mark Range
Work with some novelty, with highly sophisticated level of theorisation and innovative conceptualisation. Best paper award, only needing amendment to match house style. Results thoroughly discussed with a very good evaluation of own work. Plenty of documentation from various sources. Very well-Structured dissertation with coherent chapters, a very good writing Style.	90 -100
Project thoroughly investigated with some new fundamental findings of a greater originality – work of publishable quality after some refinements – a wide range of pertinent literature surveyed – project deeply analysed, very well designed with a complete implementation. A well evaluated project. A very well organised and written dissertation.	80 - 89
Potentially publishable results needing significant work prior to publishing. Originality in the way topic is developed. Comprehensive integration of relevant literature. Deeper analysis with a solid design followed by a full implementation. A very good discussion of results and evaluation of own work. A well organised project with a sound writing style – high quality product.	75 - 79

A challenging problem thoroughly analysed, very sophisticated design and fully implemented functions. Good integration of relevant literature survey – strong grasp of conceptual context. Good discussion of results, good evaluation and writing style – a very good quality product with well-reasoned recommendations for future work.	70 - 74
Good research elements with a sufficiently challenging problem – a critical analysis, good design and full implementation. Sufficiently well written dissertation with a good evaluation of own work. Good awareness of difficulties. A good discussion of results with sound presentation of arguments.	65 - 69
A good research topic with a good implementation but lacking depth and criticality (analysis, design). Full implementation. Good evidence of literature survey but of a limited range. A good attempt to discuss results and evaluate own work. A well written dissertation	60 - 64
A sufficiently challenging project but very superficial analysis, less efficient design, at least partially implemented. A limited background search – adequate written style. Some attempting at discussion of results and evaluation of own work. At least an acceptable prototype.	55 - 59
Project not fully investigated with a little evidence of awareness of other work in this field. Typically, at least one or two of the following shortcomings; poor analysis and design, poor evaluation of own work incomplete implementation, virtually no discussion of results.	50 - 54
No attempt to fit the work into a research context or justify the choice of problem. A challenging problem poorly attempted. Any of the following could justify this fail mark: - Limited range of sources - The fundamental question not understood by the student - Many key points of analysis missing - Poor design - Too little implementation - Dissertation poorly written	45 - 49
As above but with weaknesses in more areas	40 - 44
Weak in all areas	30 - 39
Very poorly attempted work	0 - 29

-End of Paper-
